-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-13, 15-18, 26-28, 30, 42-44, 52, and 53, drawn to a method for searching purchasable products from a product information distribution system, classified in class 707, subclass 3.

Group II: Claims 14, 19-25, 29, and 31, drawn to a method for generating data structure via user interface, classified in class 707, subclass 102.

Group III: Claims 32, 33: drawn to a method for enabling a query to be performed on a database, classified in class 707, subclass 4.

Group IV: Claim 34: drawn to a method for classifying and displaying product related information to the intending customer, classified in class 707, subclass 516.

Group V: Claims 35-41, 45-51, and 56: drawn to a method for generating and providing an instruction to a device for querying a database, classified in class 707, subclass 10.

Group VI: claims 54, 55, and 57: drawn to a method for determining entities of interest from within a region, classified in class 707, subclass 101.

The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I, II, III, IV, V and Group VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as searching purchasable products from a product information distribution system, Group II has drawn to a method for generating data structure via user interface, Group III has drawn to a

Art Unit: 2175

method for enabling a query to be performed on a database, Group IV has drawn to a method for classifying and displaying product related information to the intending customer, Group V has separate utility such as providing an instruction to a device for querying a database, and Group VI has separate utility such as determining entities of interest from within a region. See M.P.E.P. § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, IV, V or VI; and the search required for Group II is not required for Groups I, III, IV, V, or VI, and so on, restriction for examination purposes as indicated is proper.
